

Curfew Monitor

BRACELET-FREE ELECTRONIC MONITORING

JUST THE FACTS

- Locate offenders anytime, anywhere through a wired phone or cell phone when used with CellTrax.
- Use offender's own phone—no equipment to purchase or maintain
- Completely flexible schedule for random check-ins
- AnyTrax Voiceprints verify the presence of the offender during every check-in
- Documented and verified offender contacts
- Offender funded programs available

What is Curfew Monitor?

Curfew Monitor is an effective and inexpensive alternative to equipment-based electronic monitoring. Using the telephone and voiceprint biometrics, Curfew Monitor verifies offender compliance with curfew/house arrest conditions and notifies the officer of any exceptions.

Why is Curfew Monitor right for you?

Your officers spend too much time managing EM alerts and equipment.

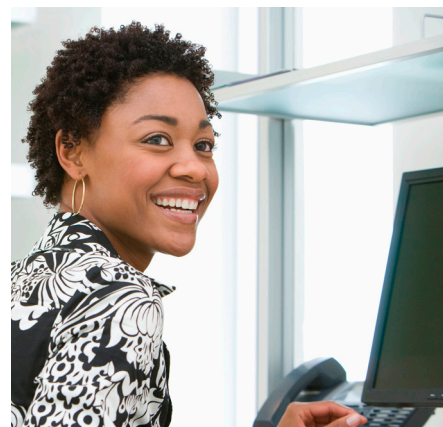

Officer time should be spent moving towards better outcomes for their offenders. Our system randomly performs offender location checks one or more times per day. Best of all, we do this without overwhelming you with false alerts or requiring you to manage any type of equipment.

When location monitoring matters and officer time is at a premium, Curfew Monitor is the right supervision tool for your agency.

Curfew Monitor -- electronic monitoring without the hassle.

AnyTrax Curfew Monitor randomly notifies an offender to call a toll-free number and interact with the automated system.

- Offender identity is verified by voiceprint biometric.
- Offender location detected by either a wired telephone or with CellTrax cellphone locator.
- Flexible scheduling allows officer to tailor program to offender needs.
- Every contact is fully documented.
- Any issues, such as missing a check-in or checking in from the wrong location, are shown on the AnyTrax officer dashboard for quick and easy resolution.

REAL VALUE. BETTER OUTCOMES.
