What is it?

The OM210 is a 1-piece GPS/wireless offender monitoring ankle bracelet built specifically to track low to high-risk offenders 24/7, indoors and out. Created by Omnilink—the location technology experts—the OM210 was the first 1-piece bracelet and the first bracelet to track indoors. Today it's the most proven ankle bracelet, and sets the standard in reliability and ease of use.

“We service a large metropolitan area and expect our vendor’s equipment to be reliable and beyond reproach. Omnilink’s technology does an excellent job of servicing our needs without issue.”

—Sergeant Jason Wilson, Las Vegas Metropolitan P.D.

Putting the device on an offender takes fewer than 30 seconds and requires no tools. Omnilink’s award-winning application—FocalPoint™—makes intake and ongoing offender management simple, with robust software features created to match agency requirements. Easily create inclusion and exclusion zones of any size and shape to deter offenders from traveling out of inclusion areas like their home or workplace, and into exclusion areas like school grounds and victims’ residences. Then create basic or detailed schedules to manage zones. Receive real-time alerts and text/email notification if zone restrictions are broken, if offenders tamper with the OM210 strap or device, or if the device’s location cannot be found.

Who is it for?

Government agencies, justice service providers, private businesses, and technology resellers that want the most advanced and cost-effective way to monitor offenders 24/7/365. The OM210 is for organizations that want the most reliable and intuitive technology, so they feel confident and comfortable monitoring any type of offender.

The device of choice for resellers and gov't agencies, the OM210 sets the standard in reliability and intuitiveness.

“Your device has to work. False pings are not acceptable. When you’re in court you must have faith in your equipment. You must know that it works right. Nothing I have ever used—and there have been many—can compare to Omnilink.”

—Bill Delehanty, Clark County Superior Court

Reliable monitoring

Reliability is everything in offender monitoring. That’s why organizations choose Omnilink—the location technology experts. Our technology is the most advanced so your location data is the most dependable and precise.

- The first—and the most advanced—indoor tracking
- The longest battery life in the industry
- Fewest false tamper alerts in the industry
- Thwarts hackers with proprietary signal encryption
- Ensures data delivery with multiple transmission methods
- Patented Precision Engine increases location accuracy

Intuitiveness

Technology is just another tool you use to get the job done better, easier, and quicker. If technology isn’t intuitive—if it’s frustrating, complicated, or high-maintenance—we believe it’s not worth having.

- Most user-friendly software in the industry
- The first—and still the most proven—1-piece ankle bracelet
- Adjustable, reusable, one-size-fits-many strap
- Easy ‘no tools’ installation
- Dishwasher safe and truly 100% waterproof
- The longest battery life in the industry
- Battery fully recharges in just 90 minutes
- Automatically reduces inbox clutter with fewer alerts
